

KNAPP Releases Best of Breed and Best of Suite Software at ProMat 2025

KiSoft and SAP by KNAPP Featured in Newest Release

Atlanta, Georgia – March 17, 2025 – KNAPP, the reliable technology partner for value chain innovation, is proud to announce the release of the latest versions of KiSoft and SAP by KNAPP at ProMat 2025. Based on client preferences, the choice of application can deliver either best-of-breed or best-of-suite solutions to KNAPP customers.

The KNAPP team will present its comprehensive software solutions, including KiSoft, an all-in-one solution that encompasses WES (Warehouse Execution Systems), WCS (Warehouse Control Systems), and WMS (Warehouse Management Systems). KiSoft integrates processes within the warehouse, coordinates and optimizes the flow of goods, controls and monitors automated systems and equipment, and manages overall warehouse operations, including inventory management, order processing, tracking and last-mile delivery.

For customers committed to SAP® and using or planning to use an SAP IT strategy, KNAPP offers SAP® by KNAPP, a modular, standardized approach that provides an end-to-end SAP solution combining the advantages of best-of-breed and best-of-suite. KNAPP has delivered and installed over 100 SAP sites.

Mario Berger, one of KNAPP's software specialists commented, "Another KNAPP innovation making its debut at ProMat is KiSoft Delivery Solution, which was developed to support companies in dynamically planning their extralogistics processes, specifically by providing transport management for the last mile. The result is optimized transport capacity and fewer CO₂ emissions, since fewer trucks are on the road and fewer empty miles are driven. With this solution, KNAPP fulfills its last-mile promise to be a steadfast partner for their customers even beyond the warehouse."

Jusuf Buzimkic, Chief Sales Officer of KNAPP North America, added, "Software is a pivotal element in our value chain, integral to every facet of KNAPP's systems and processes. Our customized solutions offer rapid adaptability, enabling companies to swiftly scale their operations. Continuous innovation, supported by our dedicated team of experts, ensures that our customers' operations utilize the latest technologies and maintain peak efficiency—offering our customers a distinct and unique option in the marketplace."

KNAPP is the reliable technology partner for value chain innovation. Headquartered in Austria with 49 subsidiaries worldwide, KNAPP provides proven software and hardware solutions for intelligent logistics automation, from production and distribution to point of sale. A collaborative approach and excellent service position KNAPP as a trusted, stable partner for success in healthcare, retail, fashion and apparel, food retail, wholesale, manufacturing, or ecommerce.

[ProMat](#) 2025 is the premier event for manufacturing and supply chain professionals, offering a comprehensive showcase of the latest innovations in material handling, logistics, and supply chain solutions. Held from March 17-20, 2025, at McCormick Place in Chicago, IL, ProMat 2025 will feature over 1,000 exhibitors specializing in automation, robotics, AI, and sustainable logistics solutions. Attendees will have the opportunity to explore cutting-edge technologies, participate in expert-led seminars, and network with industry leaders.
